1 Aim

- 1.1 The aim of this policy and procedure is to make sure that we proactively manage and reduce our exposure to debt risk, arising through non-payment of bills by residential customers, whilst at the same time being sensitive and understanding of our customers personal circumstances.
- 1.2 Having a robust approach to credit control and debt management will allow us to operate efficiently and make sure we provide a fair and equitable service to all customers.

2 Scope

- 2.1 This policy and procedure set out our approach to credit control and debt management for customers who we supply and bill for heat services.
- 2.2 Some customers pay for their heat services using a prepayment or Pay As You Go (PAYG) meter, whilst others are billed in arrears by issuing monthly bills. This policy and procedure will mainly apply to credit billed customers. Due to the nature of prepayment meters debt risk is inherently lower for PAYG customers, there may however still be times when elements of this policy and procedure will apply to PAYG customers.
- 2.3 Where customers pay for their heat services using a PAYG meter we do not offer the option to switch to credit billing.
- 2.4 This policy and procedure apply to any contractors providing metering and billing services on our behalf.

3 Policy Statement

- 3.1 We will:
 - At all times treat customers fairly and with the respect they deserve.
 - Make sure we bill customers accurately based on actual meter readings.
 - Adopt a fair and consistent approach to credit control and debt management.
 - Make sure that all our staff are trained to listen for clues that a customer may be experiencing financial difficulty or vulnerable circumstances.
 - Make sure our staff are trained on how to offer suggestions to reduce consumption or signpost customers to third-party organisations who may be able to help if a customer is experiencing financial difficulty.
 - Be understanding of our customers individual circumstances by offering flexible and affordable repayment plans, so making sure that debt recovery will not unnecessarily disadvantage customers already experiencing financial difficulty.
 - Under no circumstances disconnect heat supply during the heating season to customers registered on our Priority Services Register as vulnerable to the cold.

4 Credit Control Procedure for Residential Customers

- 4.1 The below credit control procedure applies to residential customers billed monthly in arrears. i.e. credit billed customers.

4.2 Stage 1: Late Payment Reminder Notice

- 4.2.1 The day after a bill becomes overdue, we will send the customer a late payment reminder notice. This will be sent using the same method (email or post) that they receive their bills. The late payment reminder notice will inform the customer that the debt exists and should be paid immediately. The notice will provide information on:
 - the amount of heat consumed by that customer,
 - the amount owed by the customer,
 - the date of the relevant heat bill and the original due date for payment,
 - how to pay the amount due,
 - actions that may be taken if the amount due is not paid,
 - the deadline by which the customer must pay the amount due,
 - how to contact us, and
 - third-party services that can help those in financial difficulty.
- 4.2.2 The customer will be given 14 calendar days from the date of the late payment reminder notice to settle their outstanding balance in full.

4.3 Stage 2: Final Late Payment Reminder Notice

- 4.3.1 If the account remains outstanding after 14 calendar days, we will issue a final late payment reminder notice by both email and post which will include information on:
 - the amount of heat consumed by that customer,
 - the amount owed by the customer,
 - the date of the relevant heat bill and the original due date stated for payment,
 - information on how to pay the amount due,
 - the deadline by which the customer must pay the amount due,
 - the date when we will disconnect the customers heat supply, in accordance with the terms of our Residential Heat Supply Agreement, should full payment for monies owed not be received,
 - next steps which we will take to pursue any outstanding bills as a debt claim via the court system or escalating to the Landlord if the property is rented and the account holder is the tenant.
 - additional charges that may apply should the customer not contact us about their debt before the final payment date provided, including but not limited to, our disconnection and reconnection charge and any interest owed on overdue payments,
 - how to contact us, and
 - third-party services that can help those in financial difficulty.

- 4.3.2 Customers will be required to make payment within 14 days of the final late payment reminder notice.
- 4.3.3 In addition to issuing the final late payment reminder notice, we will attempt to contact the customer by telephone to discuss the outstanding balance. The call will confirm the current outstanding balance on the account and check if payment has recently been made. If payment has been made the customer will be asked to confirm how the payment was made and when. If receipt of payment is confirmed, the Customer Care Advisor making the call will thank the customer for the payment and apologise for the call.
- 4.3.4 If no payment has been made, the customer will be reminded that the outstanding balance should be paid immediately by either logging in to their online account or using our automated telephone payment service.
- 4.3.5 If not in a position to pay the outstanding balance, the customer will be asked if any problems exist with the account or if they are having difficulties making payment.
- 4.3.6 If the customer is having difficulty making payment alternative payment terms will be discussed and, wherever possible, a mutually agreed repayment plan set up to recover any debt within a 9-month period. This recovery should be a fixed amount per month. During this time we will still require payment for all future charges/bills.
- 4.3.7 All communication with the customer will be recorded in our customer relationship management database, noting the date and time of the call and a brief explanation of the purpose and outcome of the call.

5 Supply Disconnection

- 5.1 If the customer still hasn't made payment within 14 days of the final late payment reminder notice, or hasn't made contact to discuss alternative payment arrangements, we will disconnect their heat supply the next working day after the payment due date in the final late payment reminder.
- 5.2 As per the terms of our Residential Heat Supply Agreement, if we need to disconnect a customer's heat supply, they will be charged a disconnection fee. The amount charged will be dependant upon whether we are able to remotely disconnect the supply or if we need to send an engineer to site.

6 Supply Disconnection and Customers in Vulnerable Circumstances

- 6.1 Aligned with our Helping Hand Policy, we will never disconnect heat supply during the heating season to customers who are registered on our Priority Services Register as vulnerable to the cold. However, as set out in our Heat Supply Agreement we will still require full payment for any heat used.
- 6.2 To make sure that a customer who is vulnerable to the cold is not disconnected during the heating season should they not pay their bills, they will need to contact us to be added to our Priority Services Register. We will highlight on our Priority Services Register that the customer is vulnerable to the cold, so we know not to disconnect their heat supply during the heating season.
- 6.3 We will always check our Priority Services Register before disconnecting a customer's heat supply.

7 Supply Reconnection

- 7.1 On payment by the customer of the outstanding balance or on satisfactory establishment of a repayment plan, if during normal working hours and we can reconnect the supply remotely, we will reinstate heat within 4 hours.
- 7.2 If an engineer needs to attend site to restore the supply, provided it is during normal working hours, we will reconnect the supply within 24 hours.
- 7.3 As per the terms of our Residential Heat Supply Agreement customers will be charged a reconnection fee. The amount charged will be dependant upon whether we are able to remotely reconnect the supply or if we need to send an engineer to site.
- 7.4 Before reconnecting the heat supply, as per the terms of our Residential Heat Supply Agreement, we may collect an advance payment or security deposit to cover potential default on future payments.
- 7.5 If we decide to take an advance payment or security deposit to cover potential default on future payments, we will review the customer's account after six months of taking the security deposit. If the customer has paid all their bills on time during this period, we will refund the security deposit in full. If this is not the case, the security deposit will be retained, and a further review carried out after another six months has passed.

8 Our Right to Switch Credit Billed Customers to Pay As You Go (PAYG)

- 8.1 For credit billed customers who refuse or fail to pay their bills when due, we reserve the right within the terms of our Residential Heat Supply Agreement to install a PAYG meter and ancillary equipment to measure and control the provision of heat to their supply address.
- 8.2 The cost of installing the PAYG meter and ancillary equipment may be passed on to the customer.
- 8.3 When the PAYG meter and ancillary equipment has been installed any debt will be recovered as a percentage of any top ups which the customer makes to their meter.
- 8.4 If a customer requests to be switched back to credit billing this will be actioned, subject to:
 - all outstanding debts being cleared,
 - the customer satisfactorily passing any relevant credit checks, and
 - collection of an advance payment or security deposit as security for future payments.

9 Credit Control and Debt Management for PAYG Customers

- 9.1 For customers with PAYG meters we offer both friendly hours and emergency credit facilities.
- 9.2 Friendly hours credit means that if a customer runs out of credit after 5pm on a weekday, at any point over the weekend, or on a Bank Holiday, their supply will not be suspended. However, if they do not top up before 9am the next working day, when friendly hours credit ends, their supply will be immediately suspended until they top up and have available credit on their meter.
- 9.3 Emergency credit must be activated by the customer and will allow the customer a £5 debt facility before their supply is suspended. This gives customers some flexibility if they do not immediately have the funds to top up their meter.

9.4 As soon as a customer makes their next top up, any debt built up whilst either in friendly hours or emergency credit mode will be recovered immediately. For example, if a customer uses £2.50 of their emergency credit and then decides to top up their meter with £10, £2.50 of this will be deducted straight away to pay off the debt, leaving £7.50 available credit on their meter.

9.5 If a PAYG customer runs out of credit, including their emergency credit facility, and does not top up their meter, their heat supply will be automatically suspended. The daily standing charge will continue to accrue. If the customer continues not to top up, we will follow the procedure set out in section 5 above, which may lead to us asking a debt collection agency to recover any monies owed or taking court action.

9.6 Any costs for recovering monies owed will be passed on to the customer, we are also entitled to charge interest on any monies owed.

10 PAYG Exception Review

10.1 For customer accounts operating in PAYG mode, we will perform a monthly exception review to identify those customer accounts where exceptions exist. As part of this review the following exceptions will be highlighted:

- no consumption,
- high credit balances,
- heat meters continuing to clock usage despite no credit being available, and
- customers who haven't made further payment following their heat supply being suspended due to all credit, including any emergency credit, having been used up.

10.2 Where exceptions are identified these will be investigated and appropriate action taken.

11 Monitoring, Review and Evaluation

11.1 As a minimum this policy and procedure will be reviewed once a year or in response to changes to Heat Trust Scheme Rules, or the introduction of new regulation directly affecting the services we provide.

12 Diversity and Inclusion

12.1 We are committed to valuing and promoting equality and diversity and will treat all customers fairly and with respect.
